Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 7 is objected to because of the following informalities: there is no antecedent basis for "said extension housing". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Canada 670,052.

Claims 1-5, 7-13, 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Davidovitz. The blade appears to be a "dado" blade that is powered by rechargeable batteries.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 14, 18-19 rejected under 35 U.S.C. 103(a) as being unpatentable over Davidovitz. Gravity switches are old and well known in the art and absent a showing of criticality would appear to be obvious to use with the device of Davidovitz. Regarding

Art Unit: 3724

claim 14 the choice of the exact material for the cap of the tool is a matter that would be one of routine choice to be made by an artisan. Regarding claim 19, the extension housing of Davidovitz is not exactly coaxial with the drive shaft however so specifying such an arrangement would not appear to create any unobvious result and would be an obvious modification.

The patent to Pettigrew et al. is cited to show a dado blade.
